

GREENS REPORT JAN 2008

Greens meeting Sat Jan19th at 10am

Present M Clark, K Duncan, J Peden and J Stevenson.

A golf course walk took place, to look at the progress of the Winter programme. The bunker work is now nearing completion, with the bunker to the left of the 13th green needing a new drain installed. The area of drainage in front of the 13th tee will be turfed over and in play for the new season. The course has once again coped well with the recent wet weather.

Eamonn Wall, the tree advisor, visited the course the previous week. (Report available on web site)

The greens committee agreed with Eamonn's findings with regards to the removal of the conifer trees adjacent to the second medal tee, replacing them with bird cherry, and lime trees. The recent wind storm has damaged some trees, which have been removed. It is intended to replace these.

Suggestions were made at the club AGM to put in steps to the 14th ladies tee. Joan to advise. We also looked into the possibility of a hand rail to aid walking up the path from the 5th green to the 6th tee. It was unanimously felt a rail wasn't required.
