# The Complete Club Management System

Touch Screen Player Score Input System linking to the market leading ClubV1® suite of club management products.

## Overview

Originally, clubs introduced PSI (Player Score Input) to remove the irksome task which presented itself to handicap committees when it came to entering competition cards but over the past twenty years, PSI has developed into a much broader player interface which allows golfers to book tee times, sign-in and submit competition scores.

Users can also view and request handicap history and certificates, pay competition entry fees and view pictures of their playing partners.

CSI are now using contactless technologies to ensure their customers current and future needs can be met without unnecessary upgrades or expense. Contactless cards protect personal information and/or deliver a fast, secure transaction through a secure microcontroller and a small antenna which communicates with a contactless reader through a radio frequency interface.

## How can PSI benefit your club?

A PSI system provides many additional benefits to your club whether your club is installing PSI for the first time or if you are upgrading an existing system to touch screen.

Multiple PSI systems can be operated on the same network for ease of use for members- have one area of the clubhouse (eg. ProShop) as the designated sign-n area, and score entry/leaderboard view in another, catering for team and individual events (qualifying and non-qualifying).

By installing terminals in the clubhouse, you encourage the 'car park golfer' to come into the clubhouse which not only increases social activity but also revenue to the clubs bar and catering facility.

### INTEGRATION BENEFITS

Full integration with other ClubV1® modules including membership, online booking, EpoS and HowDidiDo® meaning that all competition related club activity can be operated under one roof.

### SCORES AND RESULTS

Members can enter their own scores, view a built in real-time leaderboard showing overall and divisional scores and estimated CSS and automatically publish results to the internet through HowDidiDo.com.

### ADVERTISING OPPORTUNITY

Use the PSI Touch system to advertise forthcoming events and club notices using the built in notice board software or Microsoft Powerpoint to increase interest and attendance to club functions.

## INSTALLATION AND TRAINING

Prior to installation Club Systems will provide cable (if required) for the club to lay for connecting to the club's existing network or back to the handicaps PC. If the club chooses the 17" wall mounted option, then a wall bracket will be supplied for the club to install prior to our visit or alternatively, the screen can be mounted onto a plinth stand.

Upon arrival, our representative will terminate the cable(s), set up the hardware, load the touch software and, once the system is up and running, train those involved with the touch screen operation.

## WHAT'S INCLUDED?

- 15" desk or 17" wall mounted Touch Screen
- Internal Processor with Windows operating system
- Integrated Swipe Card Reader
- PSITouch Software
- Installation and Training
- All required cables
- Telephone support 9am-9pm 365 days a year

Experience the versatility of  PSITouch™ in YOUR club
