

COURSE UPDATE

As of the 30th March the golf course will return to its original layout.

Access paths have been created to the newly formed temporary tees at the 16th hole. The Men's tee is situated just behind the newly constructed tee and the Ladies tee is positioned just over the newly formed ditch.

Drop zones have been created for balls going over the heras fence and into the new ditch. All tractor tracks and tree stump removal areas to be treated as G.U.R also a free drop.

The heras fencing has been put round the areas of work for **Health and Safety** reasons so please stay out.

There will be a couple of one or two day closures to the last three holes during the season (not at weekend). This is to carry out essential works to create finer grasses for the new fairways and the seeding of the newly constructed 1st green.

We appreciate that these works have and will impact on your play as some holes have been closed while the work is carried out. It is very difficult to create two brand new golf holes on top of three existing holes without a bit of disruption. We hope that you will give every support and encouragement both to the contractor's staff and our own green staff while the project is ongoing.

All the best for the upcoming season!

Regards
Scott Chisholm
