The most important part of the upgrade process is the data conversion from your current CLUB2000 software. In order to help this process we are recommending to customers that they have a look at the current state of their data and make it as clean as possible before we start the import process. To speed this process up further we can book for a member of our staff to visit your club to help and give you some advice before the conversion and also provide some training on ClubV1 once the data has been converted and your software upgraded. This is chargeable at a cost of €500 plus VAT.

There is no charge to upgrade your software to ClubV1, however clubs using PSiTouch and/or MerlinTouch will require an onsite visit for installation and training charged at €400 +VAT.

Users requiring training for office staff or committee members can book on site or online training at additional costs of €400.00 for up to 4 hours.

Following the upgrade help from our CSiCare support team is available 7 days a week.

Prices are subject to VAT charged at 20% where applicable
