

I am pleased to inform you that the members area is now available, this is included with ClubV1 Premium.

You can access the members area by:

1) Downloading the android or Apple IOS app from the appstore. Search for 'ClubV1 Members Hub' or click the relevant link below:

Android: <https://play.google.com/store/apps/details?id=com.clubsystems.clubv1hub>

Apple: <https://itunes.apple.com/gb/app/clubv1-members-hub/id1247886260?mt=8>

2) You can access via a webpage (Yours being <http://templenewsam.hub.clubv1.com/>)

To use the APP, members must login using their existing HowDidiDo details, or they can register for an account if haven't used HowDidiDo before.

In order to verify that they are a registered member of the Golf Club, they will be prompted to verify the membership information. The email address they log in with must match what the club has on record for them. On 1st launch they will be asked to scan for your club. The member will also be asked to verify the 1st line of the address (The address stored in ClubV1)

They will also be sent an email to confirm the validity of their email address. Once activated, they will be able to login.

Within the Members area you can make tee bookings via HowDidiDo or BRS Golf, view your bar balance and recent till transactions, as well as having access to the members list, and the ability to edit your own privacy settings. The club can also keep the members up to date with club news and push notifications, so the app is a must.

If you use BRS booking for member casual booking or competition booking, please let me know so I can set you up.

Features Overview

Features are being added all the time to the hub, however here is an overview.

- * The HUB is a fully responsive secured area, containing Member information which is automatically updated and driven by ClubV1.
- * The hub can be used as an Android/Apple app or just as a Members area from a 3rd party website.
- * User friendly - Navigate using keyboard or mouse, touch pad or touch screen.
- * Browser compatibility - Works on Google Chrome, Mozilla Firefox, Opera, Safari and even Internet Explorer.
- * It is the central HUB for members to access all information.
- * The design will be used on other member facing products to enhance and improve the user journey and familiarity.
- * This is a great tool to supply the membership with valuable information in real-time.
- * Take the workload away from the office, allowing members to update their personal information.

Dashboard:

- The club crest is maintained via ClubV1 Settings,
- Facility to allow the Members to change the profile picture.
- The Short club name is maintained in ClubV1 Settings.
- Course Status - Realtime updated course status maintained by ClubV1 Home.
