

# ***On the tee with the Course Manager***

January 2020

Hello and welcome to the latest Course Managers BLOG , below are just a few things that have happened on the course over the last few months and what's coming up too.

## **FAIRWAYS**

After overseeding last year, recovery is 100 percent now , what a difference from this time in 2019. We will continue with aeration during the Winter. Worm casts are a little bit of problem but overall very happy with the overall condition, just remember to replace those Divots please.

## **COURSE DEVELOPMENT**

### **Tees**

Tees on the 4,7,8 have been stripped level and returfed , aeration on-going during the winter months on the remainder

### **Bunkers**

Some new additions this year on 8 and 12 , come down and have a look , delighted with the way the holes look now , we will be refacing some more bunkers in the coming months .

## **COURSE SUMMARY**

It's been rather wet lately, a years rain in the last 3 months, overall the course is holding up well , Greens are healthy, a lot of aeration happening to them - solid tine and verti drain as often as possible

A few areas of concern but overall happy with the course hopefully the New Year will bring drier weather.

The blog is always open for constructive questions. Please send via [admin@pmgc.org.uk](mailto:admin@pmgc.org.uk) and I will get back to you. See you next time on the tee
