

Dear Member,

Hurrah, we are back.

The course is ready

*The flowers are out....*

*The first game is warming up, just like the weather.*

*And we are off, with the first tee shot being struck down the middle by Billy Taggart.*

*Our members are enjoying the first day back and the super weather.....*

The spectacular 14<sup>th</sup>....

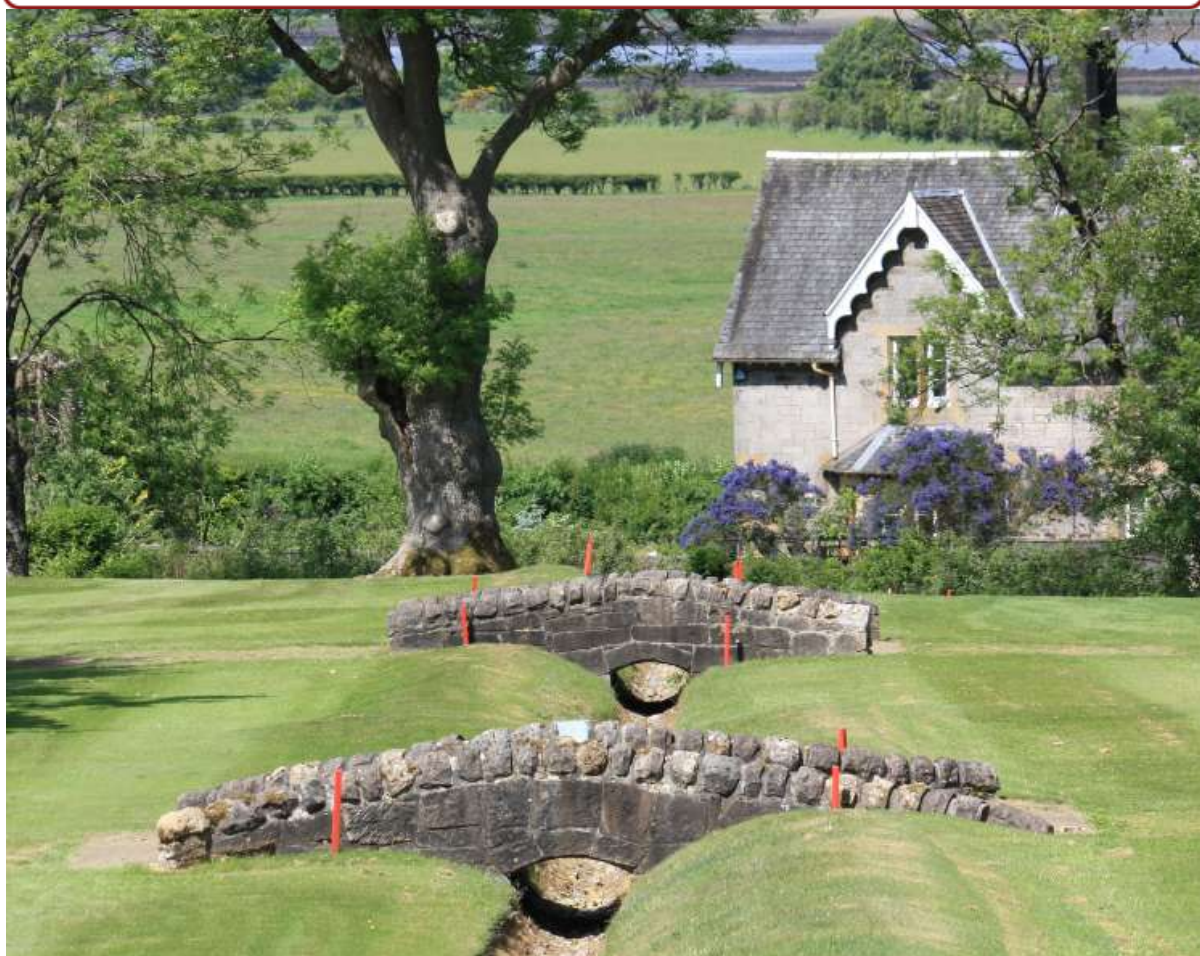

*The course has been presented in magnificent condition.....*

It is soooooo good to be back..... we very much hope you enjoy your golf for the rest of the season.....

Many thanks – Board of Directors.

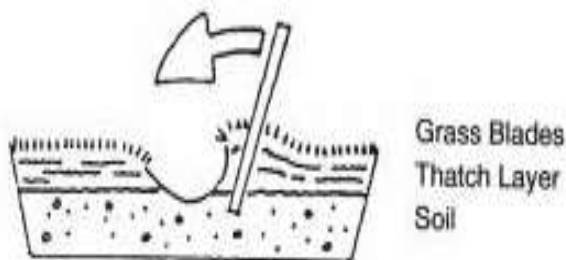

Now that we are all back, please ensure you keep our course in the best condition possible and follow the instructions below.

### Repairing your pitchmark the right way

Here is a simple diagram on how to repair a pitchmark correctly.

#### **RIGHT WAY**

1. Insert repair tool just outside the back of the ball mark. Pull the turf toward the centre of the hole. Repeat this same motion on all sides of the hole.
2. Gently tap the repaired area with your putter.
3. This action stretches undamaged turf over the ball mark providing instant recovery.

#### **WRONG WAY**

1. DO NOT pry up the centre of the depression with the repair tool as it exposes the soil and will delay the healing process.
2. DO NOT insert repair tool and twist it. This only breaks more turf loose.
3. A ball mark takes only 15-30 seconds to fix correctly, a ball mark fixed incorrectly takes over 3 weeks to heal. Please do it the right way.
