

## Greens Renovations

September 9<sup>th</sup> – 13<sup>th</sup> 2019.

During the week beginning Monday 9<sup>th</sup> September we will be carrying out greens renovations. This will involve spiking the greens, applying topdressing and other soil amendments, brushing and then seeding and fertilising.

### Why do we carry out renovations?

There are many reasons to carry out these operations, mainly to prepare the surface for the upcoming winter. This is achieved by improving water percolation through the surface, relieving compaction after a busy season, and also overseeding weak areas on the green.

### How long will it take?

We hope to complete these renovations in the week stated above, however this is very dependent on the weather and ground conditions at the time.

We may need to overrun into the following week if we do suffer complications, but we hope this is not the case and we will keep you up to date with further notices.

### Will we have temporary holes?

Yes, there will be temporary holes in use, up to 4 will be used at a time, and they will be on the fairway. This way they will be far enough away from the green to keep the greenstaff safe and to also allow us to complete the job uninterrupted.

### How long will the greens take to recover?

We hope to see full recovery in 3-4 weeks, but certainly after 2 weeks the greens will be getting back to normal.

We appreciate your patience and co-operation whilst this work is carried out.

Kind regards

Stuart Broom  
Head Greenkeeper
